1 – CHEAT SHEET

Abstract

YASH VASANT WARIK Mumbai, India | +91 9892373439 | yashwarik85@gmail.com | LinkedIn | github.com/yashwarik121 | Portfolio | Leetcode EDUCATION Shree L. R.

Key Insights

1. Hammer-Time: Formula-1 Race Prediction Model Python | XGBoost | Monte Carlo | (Github) 2026 ● Built an end-to-end F1 race prediction engine using XGBoost for lap time forecasting and 10,000-iteration Monte Carlo simulations for race outcome modeling. ● Integrated FastF1, Jolpica, and OpenF1 APIs for real-time telemetry ingestion; deployed backend via FastAPI on Render. ● Evaluated model accuracy using Brier Score; designed architecture to support real-time win probability and RL-based pit stop strategy extensions.

2. June 2024 - August 2024 • Designed a Django full-stack app to automate employee portability requests, engineered REST APIs with PostgreSQL handling 20+ concurrent requests – cutting processing time by ~40% and API latency by 35%. • Improved data accessibility across departments through indexing, query refactoring, and scalable backend service design in a live sandbox environment.

3. AI Strategy Intern BetterAlt, Mumbai, India June 2025 - September 2025 • Built and maintained KPI-tracking dashboards aggregating multi-channel campaign performance data across 3 phases. • Drove data-informed content pivots that sustained on-time sprint delivery and contributed to a 600% increase in account reach and 45% engagement improvement.

4. Project Management Intern Nuvoco Vistas, Mumbai, India December 2025 - January 2026 • Engineered ETL pipelines using React and SAP and assisted in-plant automation, leveraging schema normalization, data modeling, and automated transformation workflows to process across 12 Plants and reduce reporting effort by 80%.

5. Popcorn.Eazy (Indian Letterboxd) Python | NLP | Vectorization | Cosine Similarity | (Github) 2025 ● Engineered a genre-based recommendation engine using Python, NLP, TF-IDF vectorization, and cosine similarity ● Built by leveraging feature extraction, vector-space modeling, and information retrieval techniques to generate personalized recommendations across 50K+ movie records.

6. ● Co-authored an accepted research paper at IEEE Ignite Conf. titled "Classification of Kidney Disease using Dense and EfficientNet". ● Hackathons – 5X Finalist – | SIH 2025' Institute Level Winner. 2025 - 26 ● Top 1% Contributions among 50k members at GSSOC' 25 as an Open Source Contributor

7. ● Programming: Python, C++, JavaScript ● ML & Data: NLP, XGBoost, scikit-learn, Numpy, Pytorch, Tensorflow, REST APIs ● Databases/Dev Ops: MySQL, PostgreSQL, AWS, CI/CD, Docker, Git ● Web: Django, NodeJS, React, TailwindCSS EXPERIENCE

8. Product Intern Broadway Live, Mumbai India January 2026 - February 2026 • Architected a CRM data pipeline integrating Tele-CRM with third-party APIs, automating lead ingestion and assignment workflows across a ~250 leads/day

volume – reducing sales executive turnaround time by 20%. • Consolidated sales data across lead data spreadsheets, and third-party APIs into a unified pipeline, reducing sales turnaround by 20%.

9. ● AWS Certification - Cloud Foundations. 2026 ● Virtual Internships: Electronic Arts, JP Morgan & Chase Co. - SDE Intern |Siemens Mobility- Project Management Intern ACTIVITIES

10. YASH VASANT WARIK Mumbai, India | +91 9892373439 | yashwarik85@gmail.com | LinkedIn | github.com/yashwarik121 | Portfolio | Leetcode EDUCATION
